Subject:	Budget to install a network in the offices.
<p>Dear Margarita,</p> <p>As discussed, here I am sending you my specifications to configure our network. We have to use an Ethernet network because we need to have a lot of data traffic. The network will serve 20 workstations and 10 printers. It is essential to install a firewall because we need a secure data traffic. Can you send me a typology diagram, the necessary equipment and the total cost?</p> <p>Please contact us if you need more information.</p> <p>Greetings, Henry Smith.</p>
